ICT Tools

Working procedure

- Wireless Camera
- RFID Tag
- RFID Readers
- Label Maker
- Microcontroller
- Zigbee
- DC Motors
Methods of robot programming

- Two basic types
  - Line drawing methods
  - Terminal robot languages

Leadthrough method:
- First and oldest programming method used to position the robot.
- Programmer would move the tool through the desired movement path.
- The path is recorded by the memory of the robot controller.
- It is also referred to as "tool by showing" method.
