**CIRCULAR**

**Sub: Provision for registering for additional credits for V sem. Lateral entry students (U.G.)**

---

With reference to the above subject, it has been noticed that the subject **MA5CL1 - Applied Mathematics- II having 3 credits** is offered for lateral entry students at V semester level. The total number of credits for regular V semester students is 24, but since the above mentioned subject is offered for lateral entry students, the total number of credits for lateral entry V semester students becomes 27. The maximum number of credits a student can register during a semester is 28.

**Hence V semester regular lateral entry students are permitted to register for one additional subject having 3 or 4 credits if they have any backlog subject only.**
