ABOUT THE DEPARTMENT

The Department of Computer Science and Engineering, was started in the year 1983 with BE programme and subsequently started PG - M.Tech (Information Technology). It has grown leaps and bounds over the last three decades in terms of infrastructure, courses and faculty.

ABOUT THE SDP

Use of React JS simplifies the intricate process of building interactive user interfaces further allowing the developers to utilise individual parts of their application on both the client-side and the server-side, which ultimately boosts the overall development time.

React is a Javascript library developed by Facebook which, among other things, was used to build Instagram.com. The emphasis is on efficiency updating and rendering components in response to changes in data. It aims to allow developers to create fast user interfaces for websites and application alike easily.

The key benefits of React JS include speed, flexibility, performance, reusable components, mobile app development etc.
